REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Claims 31-36 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims. As to claims 31-32, the prior art of record does not teach a receiver controller which reconstructs the header information, when the receiver fails to detect the header information, by using reconstruction information which at least includes a part of the header information; wherein the encoded information contains a picture code stream obtained by compressing a picture signal, and the reconstruction information contains information indicating a display timing of each picture frame of the picture code stream. As to claims 33-34 and 35-36, the prior art of record does not teach means for reconstructing the header information by using reconstruction information which at least includes a part of the header information, when the receiving means fails to detect the header information. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
